

Official Team Roster & Academic Profiles

Project ATLAS-MORPH • Department of Computer Science, Nile University of Nigeria

Host Organizations: NCAIR / NITDA / FMCIDE / Awarri Technologies | **Track:** Academia & Research Track

Mrs. Hauwa Ibrahim Aminu

FACULTY SUPERVISOR

Lecturer & Academic Researcher, Department of Computer Science, Nile University of Nigeria • hauwa.aminu@nileuniversity.edu.ng

- Provides formal academic supervision, methodological verification, and inter-university research coordination.
- Oversees institutional governance and formal departmental endorsement from Nile University of Nigeria.
- Specializes in Artificial Intelligence, Information Systems, and Academic Technology Transfer in developing economies.

Medugu Wali

TEAM LEAD & SYSTEMS ARCHITECT

Student Researcher, Dept. of Computer Science, Nile University of Nigeria • m.wali@nileuniversity.edu.ng

- Architected the complete atlas_morph Python package, normalizer pipeline, and GQA 4-bit KV caching kernel.
- Implemented the NeurIPS-grade competition inference server and authored the formal technical whitepaper.
- Directs system integration, automated unit testing (100% pass across 26 tests), and release packaging.

Mutmainnah Magaji

CO-RESEARCHER & NLP BENCHMARKING SPECIALIST

Student Researcher, Dept. of Computer Science, Nile University of Nigeria • m.magaji@nileuniversity.edu.ng

- Engineered the 20-sample multilingual evaluation dataset across Healthcare, Agriculture, Governance, and Dialogue.
- Validated token fertility and Characters-Per-Token (CPT) metrics conforming to *The African Language Tax* standards.
- Coordinated independent beta-testing trials with the University of Ibadan and Obafemi Awolowo University.

Ojo Timothy

INFRASTRUCTURE & INTERFACE ENGINEER

Student Researcher, Dept. of Computer Science, Nile University of Nigeria • o.timothy@nileuniversity.edu.ng

- Built the real-time glassmorphism Speedometer Web Dashboard (web_dashboard/) with live dials.
- Engineered PEP 517/518 zero-dependency packaging scripts and automated setup tools.
- Coordinated video demonstration production, screen telemetry captures, and walkthrough script.
