Federal Ministry of Communications, Innovation and Digital Economy (FMCIDE),
Abuja, Federal Capital Territory, Nigeria.

LETTER OF INSTITUTIONAL ENDORSEMENT & NOMINATION: NATIONAL AI INNOVATION CHALLENGE (NAIC 2026) – ACADEMIA & RESEARCH TRACK

Dear Sir/Madam,

On behalf of the Department of Computer Science, Faculty of Natural & Applied Sciences, Nile University of Nigeria, Abuja, I am pleased to officially endorse and nominate our student research team for the **National AI Innovation Challenge (NAIC 2026)** under the **Academia & Research Track (Problem Statement 01: Developer Infrastructure & Tooling)**.

Our research project is titled: "**ATLAS-MORPH: Sovereign Diacritic-Aware Tokenization & Low-Rank Inference Acceleration Suite for N-ATLaS**". The project has been developed by our registered students under the formal academic supervision of **Mrs. Hauwa Ibrahim Aminu**, Lecturer in the Department of Computer Science.

Official Team Roster:

- Medugu Wali (Team Lead)** – Department of Computer Science, Nile University of Nigeria
- Mutmainnah Magaji (Team Member)** – Department of Computer Science, Nile University of Nigeria
- Ojo Timothy (Team Member)** – Department of Computer Science, Nile University of Nigeria

Institutional Assessment:

The Department has examined the technical deliverables of ATLAS-MORPH, including its open-source codebase, automated unit test suite, empirical benchmarks across Yorùbá, Hausa, and Igbo, and external testing reports from the University of Ibadan and Obafemi Awolowo University. We confirm that the solution directly optimizes Nigeria's sovereign foundation model, **N-ATLaS 8B**, reducing the severe token fertility tax and enabling deployment on standard 8GB–12GB university laboratory workstations.

The Department of Computer Science, Nile University of Nigeria, fully endorses this team and pledges ongoing institutional support, computational laboratory access, and collaboration with NCAIR, NITDA, and FMCIDE.

Yours faithfully,

Head of Department

Department of Computer Science, Faculty of Natural & Applied Sciences
Nile University of Nigeria, Abuja
